

# Connected and Complete Communications

Thomas Kisner  
DFW IT Professionals User Group  
November 3, 2011

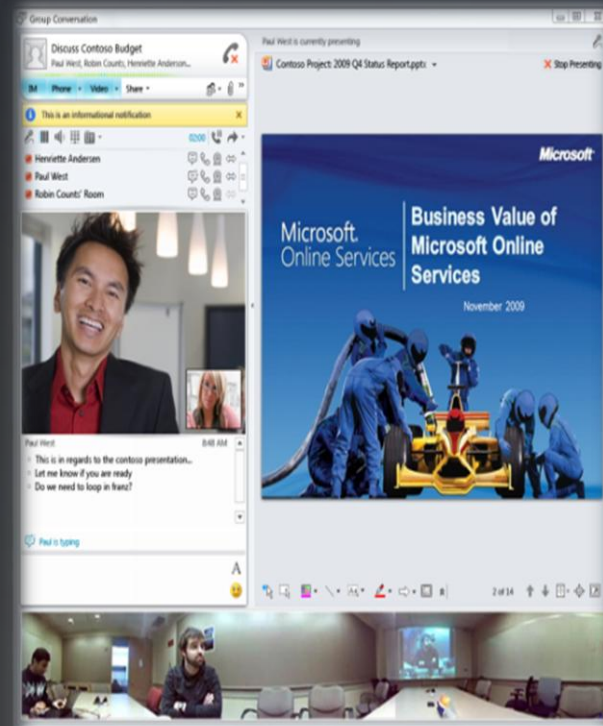

Microsoft®  
**Lync™**

# Unified Communication

- Enhanced audio, video and web conferencing experience for simple collaboration

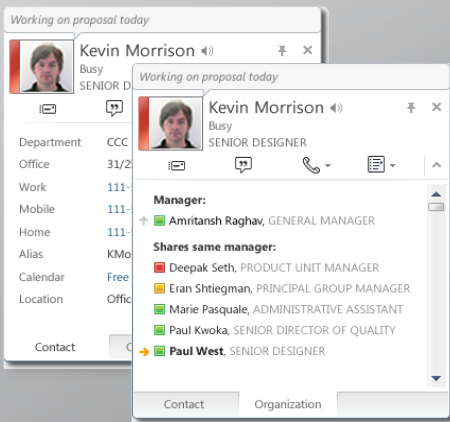

## Key Features

- Single client
- Join reliability
- PSTN conferencing features
- Rich collaboration experience
- Panoramic HD video
- Reach client

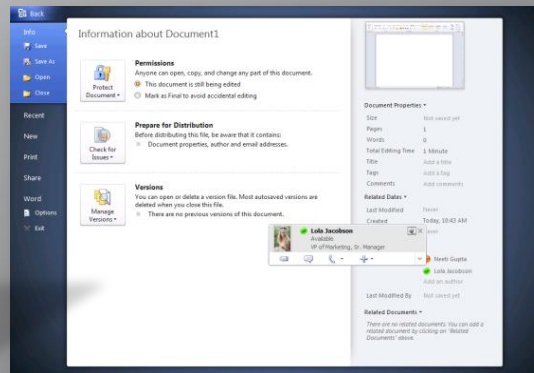

# Lync Provides a Consistent Experience Across Office

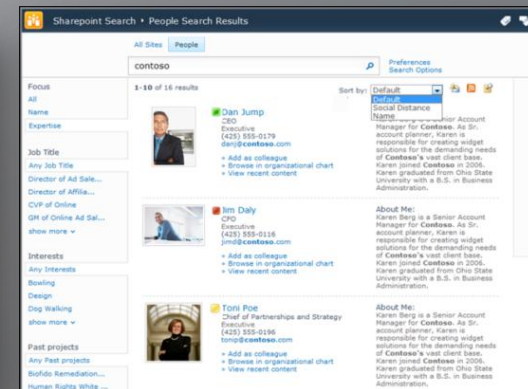

Common features across Microsoft Word, Excel, PowerPoint, Outlook, and SharePoint can help to improve the user experience

# Find and Communicate with Right People

## Consistent People Experience

- Picture
- Presence with Status and Location
- Access to Multiple Modalities

## Live Contact card

- Presence
- Active Directory® Domain Services (AD DS)
- Exchange Personal Contacts

For a door prize – who is the default contact card silhouette a picture of?

Answer:

Bill Gates

# Gartner's UC Magic Quadrant – July 2010

# Lync Server 2010 delivers on Critical Voice Features

## Microsoft Lync Server 2010

- Integrated conferencing experience
- Enhanced 9-1-1 for NA
- Survivable branch appliances
- Call admission control
- More options for devices (including lower cost)
- Call park and malicious call trace
- Additional data center survivability options

Telephony and  
Voice Mail

Unified Conferencing:  
Audio, Video, Web

Instant Messaging

## Microsoft Office Communications Server 2007

- “Anywhere access”
- IM and rich presence
- Desktop integration
- Voice features for mobile workers
- Unified messaging with Microsoft Exchange 2007
- Audio and video conferencing
- Web conferencing (Microsoft Live Meeting client)

## Microsoft Office Communications Server 2007 R2

- Desktop sharing
- Dial-in audio conferencing
- Higher resolution video
- Single number reach
- Attendant console
- Response groups
- SIP trunking

# Reducing Infrastructure Costs

A newly streamlined management infrastructure

## New Deployment Model

- Simplified topologies
- Reduced server roles
- Virtualization support for all server roles

## Enhanced Planning & Deployment

- Centralized configuration with Central Management Store
- Visual infrastructure planning with Planning Tool
- Pre-publish topology validation with Topology Builder

## Streamlined Administration & Management

- Easy-to-use, Web-based, scenario-driven GUI
- Automate repetitive tasks with PowerShell
- Enhanced security with Role-Based Access Control
- Improved monitoring on services, components, and voice quality

## Monitoring Server Dashboard

### System Usage

	This week	Trend of past 6 weeks
<b>Registration</b>		
Unique user logons	1206	
<b>Peer-to-peer</b>		
Total sessions	24867	
IM sessions	19686	
Audio sessions	4988	
Video sessions	75	
Application sharing	141	

# Manageability - Administration

- Investments increase performance and reduce total cost of ownership

## Key Features

- Lync Server Control Panel
- PowerShell
- Role Based Access Control
- Server Draining
- Enhanced monitoring & archiving

The screenshot displays the Lync Server Control Panel interface. On the left is a navigation menu with options: Home, Users, Topology, IM and Presence, Voice Routing, Voice Features, Response Groups, and Conferencing. The main content area is divided into sections: 'User Information' with a welcome message for 'VDOMAIN\Administrator' and a 'View your roles' link; 'Resources' with a 'Get Started' section and a 'First run checklist' link; and 'Top Actions' with links for 'Add new user', 'Edit or move users', and 'View topology status'. A PowerShell console window is overlaid on the right, showing commands and their output for user management. Below the console is a 'Monitoring Server Dashboard' with a 'System Usage' table and line graphs.

# Interoperable and Extensible Platform

## Integrate and Enhance Existing Investments

Lync 2010 works with other Microsoft Applications and third-party vendor technologies

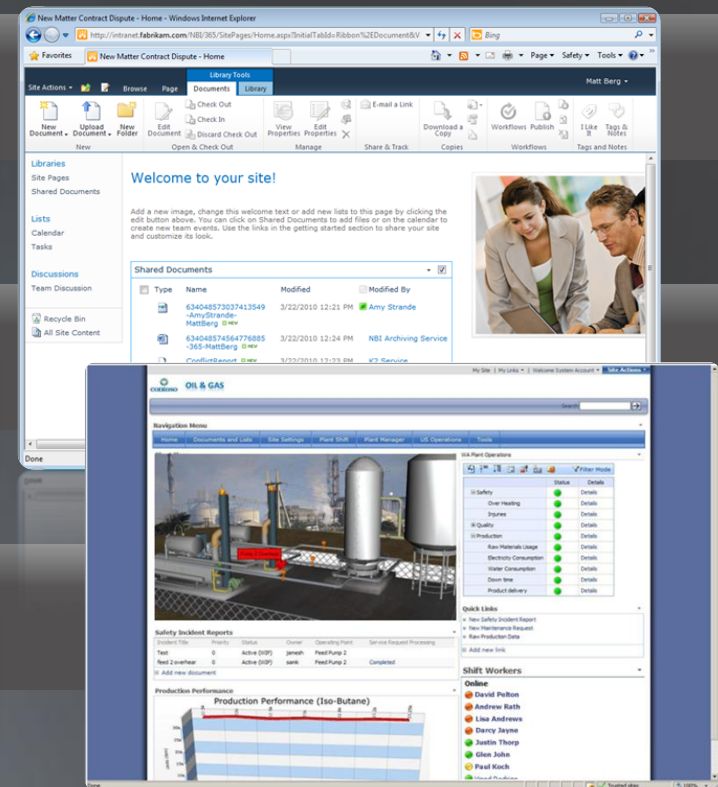

## Offer Choice in Voice

Take advantage of interoperability to replace, enhance, or add voice options

## Extend Communications to Business Processes

Integrate presence with line of business applications

# Integrate Lync 2010 Experiences with MS UC Developer Platform

Silverlight and WPF controls in .NET 3.5 managed API

Browse People

The image displays a composite of several user interface elements from the MS UC Developer Platform:

- Find People:** A search box containing 'mafarja' with a table of search results. The table has columns for Name, Keyword, and a status indicator.
- Browse People:** A list of people with their names, status, and a brief description of their current activity.
- Check details:** A detailed view for Albert Kooiman, showing his title, office, work and mobile phone numbers, home address, email, and calendar status.
- Click to communicate:** A communication card for Srivatsa Srinivasan, showing his status and calendar availability.
- Communicator Call:** A call card for Srivatsa Srinivasan, showing his contact information and a voice mail icon.
- Set personal status:** A status card for David Ollason, showing his current status and location.

# Enterprise Voice – Server Improvements

- The power of digital communication at your workplace.

## Key Features

- Survivable branch appliance
- Data center resiliency
- Call admission control
- Announcement service
- Media bypass
- E-911 for North America
- Malicious call tracing
- Response group improvements

# Survivable Branch Appliance (SBA)

A purpose-built appliance optimized to provide resilient multi-modal communication for maximizing branch office user productivity. Solution re-architected for Registrar to work when UserServices role is unavailable or unaccessible.

Components	Functionality	Go-To Market
Windows Server® 2008 R2 Mediation Server Registrar PSTN Gateway	Normal/Failover mode SIP Registrar SIP Proxy and Routing engine PSTN connectivity Voicemail routing PSTN re-routing Centrally provisioned Up to 1000 user support	OEM (Embedded channel) 5 partners: • AudioCodes • HP • Dialogic • NET • Ferrari

# Data Center Voice Resiliency

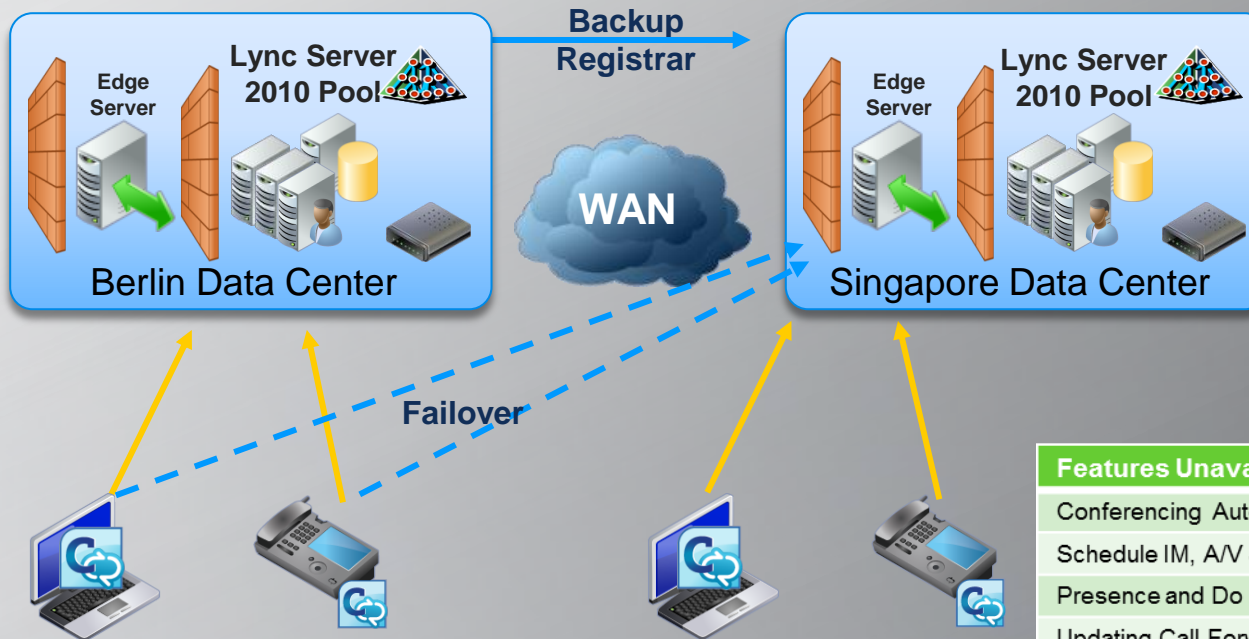

## Failover to Backup Data Center

- Lync Server 2010 pools operate as separate systems.
- Client DNS SRV request discovers one or multiple Lync Server 2010 Pools. That Lync Server 2010 Pool directs client to primary and backup SIP registrar.
- Client connects to Backup if connecting to Primary Registrar Pool fails.
  - Limited feature set available on failover.
  - Enable/Disable automatic failover, configurable failover interval.
  - Automatic Failback, configurable failback interval.
- If Primary Data Center cannot be restored:
  - Restore Central Management Server in backup datacenter.
  - Restore other services including Presence, Conferencing by “moving” users to other Pool.

# Data Center Voice Resiliency

## Failover to Backup Data Center

### Features Available to Users In Case of Data Center Disaster

- PSTN Inbound calls (carrier provided)
- PSTN Outbound calls
- Intra-Site calls and Inter site calls
- Hold, Retrieve, Transfer
- Authentication, Authorization
- 2 Party Intra Site Instant Messaging (IM) and Audio/Video (A/V)
- Call Detail Records (CDR)
- Call Forwarding, Simultaneous Ringing, Delegation, Team-call
- Join conferences scheduled by users homed on other pool

### Features Unavailable

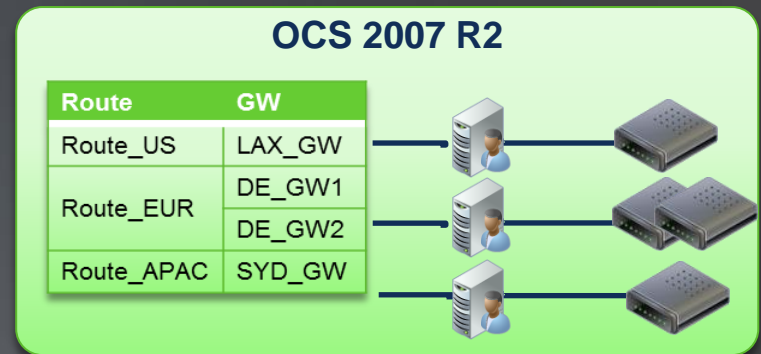

- Conferencing Auto Attendant (AA) (through PSTN)
- Schedule IM, A/V & Web Conferences
- Presence and Do Not Disturb (DND) based routing
- Updating Call Forwarding settings
- Response Group Service & Call Park
- Voicemail Deposit (Redirect to Exchange UM in the datacenter)
- Voicemail Retrieve (through PSTN)

# Mediation Service Colocation

Enabled through two enhancements that lower TCO and optimize quality

## Multiple Gateways per Mediation Service

- Lync Server 2010 allows for Gateways to be connected to the same Mediation Service
- Routes point to a Gateway
- Topology document used to find an appropriate Mediation Service, inserted into the routing path
- Mediation Service uses the GW-FQDN in the Request-Uniform Resource Identifier (URI) to route to appropriate Gateway

# Mediation Service Colocation

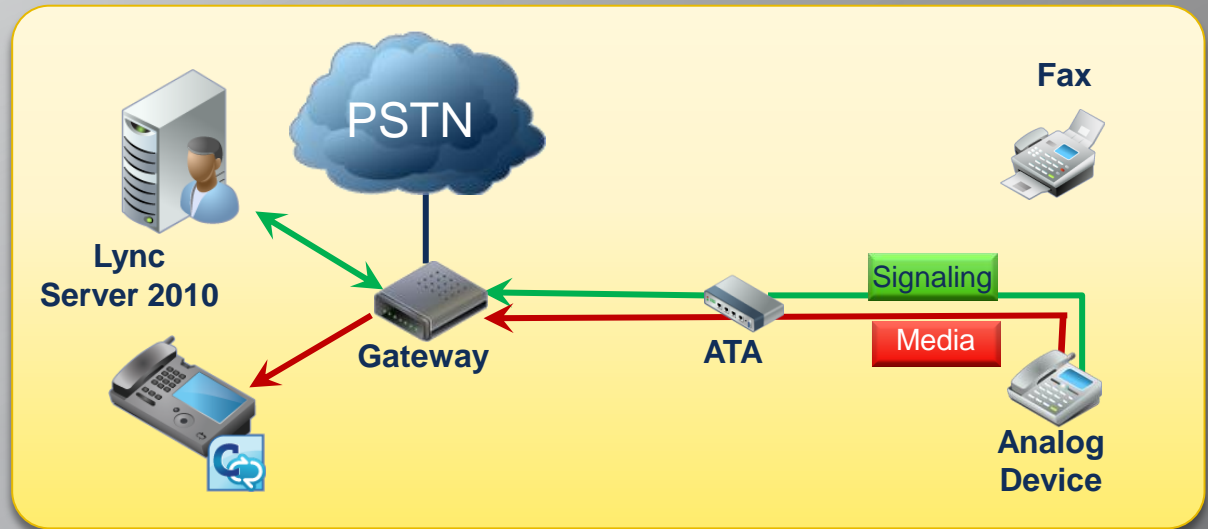

Enabled through two enhancements that lower TCO and optimize quality

## Media Bypass of Mediation Server

- Whenever possible media for calls egressing to the PSTN will flow directly to upstream device without traversing Mediation Server
- Applies where media can stay local to a capable next hop - a site or branch
  - Does not apply where media is not local
  - Signaling continues to traverse Mediation Server role
- Consolidation of most Mediation resources at the Data Center.
  - Mediation could be on a Front End, in a SBA, or standalone
  - Low CPU intensity enables running Mediation role on FE & Appliance

# Analog Device Management

- Physical connectivity of Analog devices (FXS) provided by GW partners
- All routing and policy enforcement for Analog devices centralized in Lync Server 2010 – eliminates the need to manage GWs as “mini-PBX”
- Lync Server 2010 Call Detail Record (CDR) infrastructure used to track usage
- Optimized routing allows Fax call routing through Lync Server 2010 without terminating Media

# Call Admission Control

- New Policy Server role introduced in Lync Server 2010 to support CAC
  - Admins configure logical sites based on groupings of subnets
  - Enforce policies on links between sites
    - Bandwidth available for audio, video
    - Maximum bandwidth allowed per session
    - Rerouting behavior when bandwidth limited exceeded
- Seamless support for roaming users Microsoft Lync 2010 on moving between different sites
- Allows Internet to be used for overflow of traffic
  - Support failover of video sessions

# PowerShell with Lync Server 2010

## User Management

- Search for users
- Enable/Disable for Lync Server
- Assign Lync Server policies

- Configuration Management
- Server Roles
- Global/Site level

- Device Management
- Device Configuration
- Common Area Phones
- Analog Devices

- Policy Management
- Archiving Policy
- External Access Policy
- Voice Policy

- Synthetic Transactions
- Test Phone Calls
- SIP registrations
- Simple Conferencing

- Deployment Management
- Certificates management
- Setup steps
- Topology Management

- Voice Applications
- Response Group
- Conferencing Attendant
- Bandwidth Management
- External Applications

# SBA - Partner Solutions

## Audiocodes

Mediant 1000 – 1U, 4E1/T1, redundant power supply, MSBG-Firewall, Routing engine  
Mediant 2000 – 1U, 480 concurrent calls, redundant power supply

Audiocodes:  
Existing M1k and M2k gateways can be converted to SBA

## Dialogic

DMG 4000, 1U, 4 E1/T1, Redundant power supply

Dialogic:  
Existing DMG4000 Hybrid can be converted to SBA

## Ferrari

1U, 4 E1/T1, Redundant Power supply

Ferrari: Existing R2 Hybrid gateway can be converted into SBA

## HP

SBA Module running on Procurve 54xx switch Chassis. Redundant Power supply, 8 E1/T1, Layer 2 functionality

HP:  
Customers using ProCurve switches can convert it into a SBA by buying the module

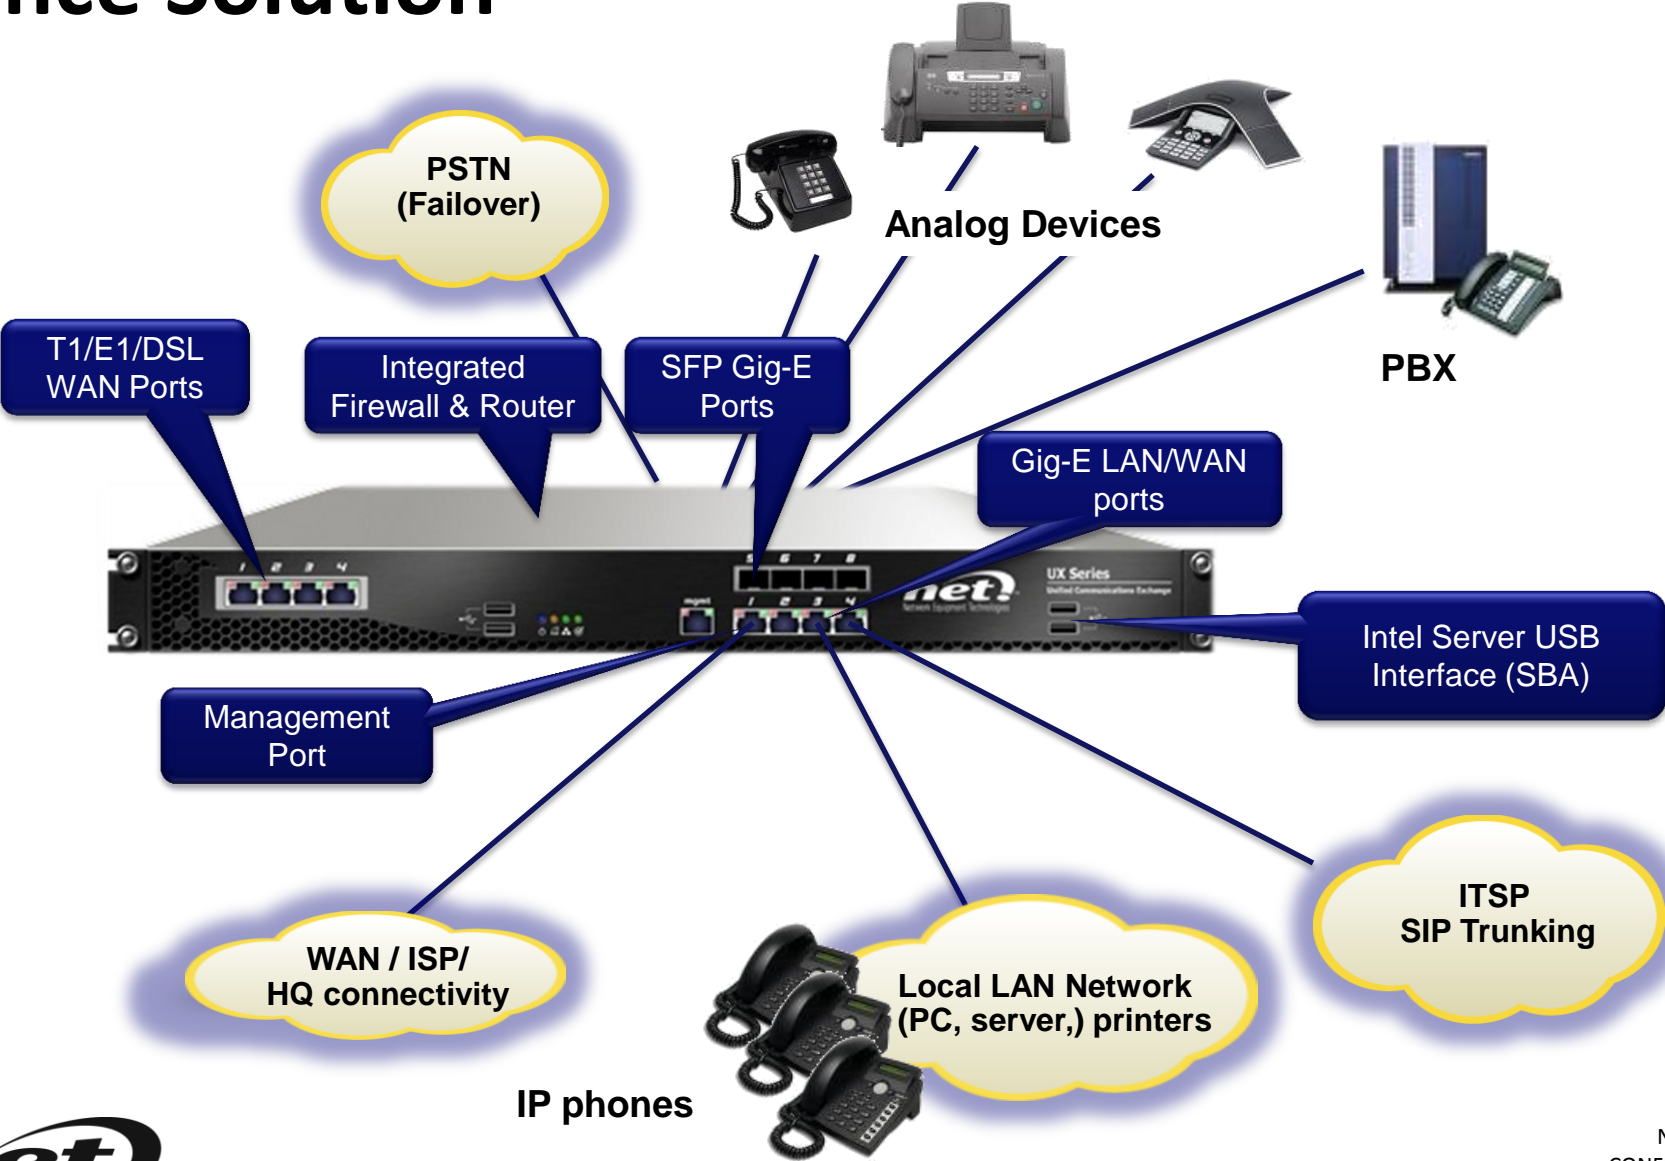

## NET

UX Series. 1U, 8 E1/T1, Redundant power supply. MSBG-Firewall, Routing engine

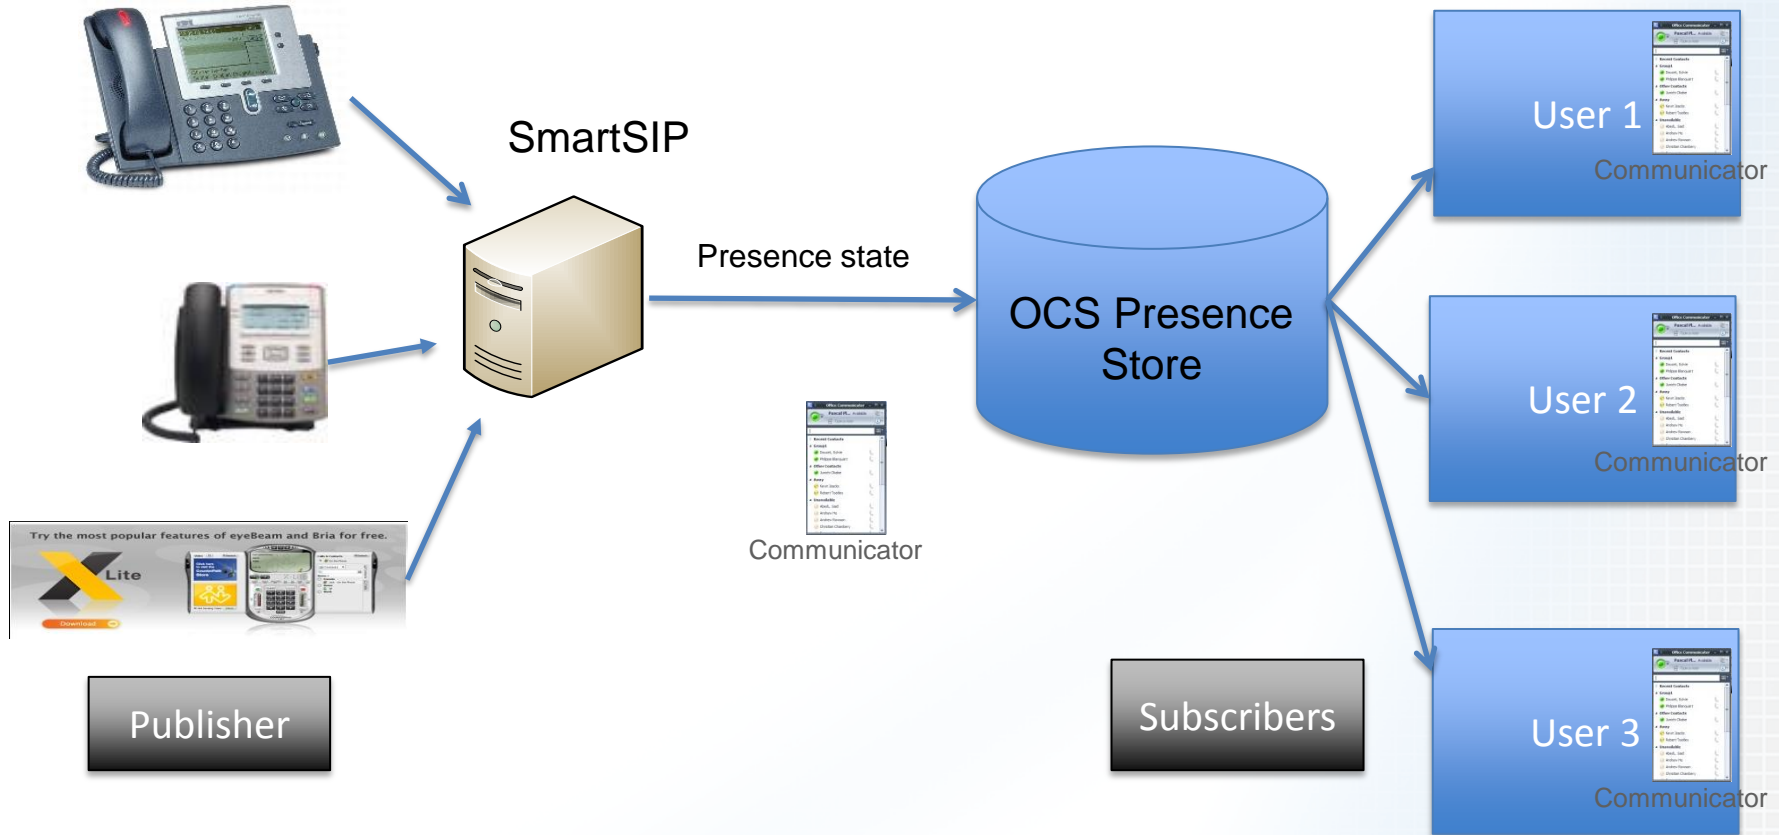

NET: New HW to support SBA. Migration plan for customers wanting to move to UX platform.

# Connecting Microsoft Unified Communications with the outside world

Simultaneous support of PBX, IP-PBX, PSTN & SIP Trunk connections to Office Communications Server 2007 / Lync Server 2010 Microsoft & Exchange Server 2007/2010

# OCS 2007 R2 IP Phone Portfolio (Recap)

OPTIMIZED FOR

Microsoft®  
Office Communicator

# Polycom CX USB and IP Phones

OPTIMIZED FOR

Microsoft® Lync™

## CX100 Speaker Phone

- Two high-quality microphones
- Hands-free model
- USB connection and power supply

## CX200 Desktop Phone

- Presence indicator
- Convenient buttons to control calls
- USB, driverless plug-and-play installation

## CX300 Desktop Phone

- Convenient dial pad and display
- High definition audio for voice and video calls
- USB, driverless plug-and-play installation

## CX500 IP Phone

- Large color display
- Call and directory information
- Single integrated PoE port
- Wall-mountable

## CX600 IP Phone

- Large color display
- Call, directory, and presence information
- USB port
- Two-port gigabit Ethernet switch

## CX700 IP Phone

- Microsoft Windows® CE device
- Full duplex
- Advanced user interface
- 5.7-inch color touchscreen
- Contact directory integration

## CX3000 IP Conference

- Interactive conference calls
- 12-foot microphone pickup range
- Large color display
- Call, directory, and presence information

## CX5000 Unified Conference Station

- 360-degree group video experience
- Combination of video, voice, and content in one interactive session

# Lync Enables New CX5000 Opportunities

- Live Meeting functions now included in Lync client
  - **Panoramic & active speaker video support** (both CX5000 and RoundTable)
  - Desktop & application sharing
  - Whiteboarding
  - Polling
- No changes to CX5000
- Live Meeting hosted service will still continue for large-scale meetings

# Polycom Telepresence Fully Interoperable with Microsoft

**Office  
(HDX 4000)**

Personal  
Telepresence

**Ultimate HD Conference  
Room (HDX 6000, 7000,  
8000, and 9000)**

# New Products for Lync

## **Jabra SPEAK™ 410 OC**

- Optimized for Microsoft® Lync
- Plug & Play
- True wideband sound for maximum call clarity
- Omni-directional (360°) microphone
- Headset port
- Portable form factor
- Hook, mute & volume control

## **Jabra GO™ 6470:**

**Stay in touch wherever you go**

## **Jabra PRO™ 9470:**

**Stay in touch around the office**

- Wideband sound (150–6,800 Hz)
- Dual microphone Noise Blackout™ system
- Bluetooth® Class 1 (Up to 100m range)
- Tri-mode connectivity
- Touch screen with Smart Setup wizard: automatic microphone tuning & phone compatibility settings
- Full hearing protection with Jabra SafeTone
- Superior comfort with 2 wearing styles
- Low energy consumption with Jabra IntelliPower
- Up to 10 hours talk time

# DFW Unified Communications User Group

- Meets 4<sup>th</sup> Thursday of Every Month 6-8PM
- Location – here at Microsoft in this room
